

PARACETAMOL

OCTAGESIC FORTE SYRUP

FORMULATION:

Each 5 mL (one teaspoonful) contains:

Paracetamol 250 mg

PROPERTIES AND ACTION:

Paracetamol is an effective antipyretic and analgesic exerting action similar to that of acetylsalicylic acid, yet free from side effects. It can be administered to children and people hypersensitive to acetylsalicylic acid. It is especially suitable for the use in pediatrics due to its antipyretic action. Paracetamol can be administered concomitantly with chemotherapeutics and antibiotics.

INDICATIONS:

Febrile states and pain of various origins, headache, toothache, neuralgia, rheumatic pain, post-operative and post-traumatic pain, influenza and common cold.

SIDE EFFECTS:

Patients who regularly take paracetamol for longer period of time should be under constant medical supervision because of possible side-effects (nephropathy)

DOSAGE AND ADMINISTRATION:

Three to four times a day.

Infants: 1/4 teaspoon (1.25 mL)

Children: 2 to 6 years old: 1/2 to 1 teaspoonful (2.5mL-5mL)

7 to 12 years: 1 to 2 teaspoonfuls (5mL-10 mL).

Or as prescribed by the physician.

CAUTION:

Foods, Drugs, Devices and Cosmetics Act prohibits dispensing without prescription.

STORAGE CONDITION:

Store at temperatures not exceeding 30°C.

AVAILABILITY AND SUPPLY:

Bottles of 60 mL.
